New Process for Re-using LoRs

There is a new process for reusing LoRs taking effect starting with the ERAS 2019 season. Students/Graduates will now be able to import their LoRs from previous ERAS seasons dating back to 2016 in their MyERAS application. This is in addition to the MyERAS History which includes: MyERAS Application, MyERAS CV, Program Report, Payment History, and Personal Statements. For students to have access to the LoRs, they would have needed to certify and submit their last MyERAS application.

The LoRs can be accessed through the pop up that appears when they first open their MyERAS application after registering, or via the History tab in the application.

The process for the MSPE and medical school transcript will remain the same. Students/Graduates will need to purchase a token each consecutive year for ERAS to retain the document.

Regards,

SJSM
