

SAINT JAMES SCHOOL OF MEDICINE STUDENT NEWSLETTER

Vol. 3 Issue 9 February 2011

SAINT JAMES IN NEWSWEEK

Saint James takes accreditation seriously and is constantly working on growing its accreditations and affiliations globally. To publically illustrate our commitment to professional standards, we recently advertised in a Newsweek feature on educational accreditation. We were delighted to be asked to feature in one of the world's leading publications.

Caribbean medical schools offer a great opportunity for students to achieve their dream of becoming a doctor in an affordable environment.

Accreditations give peace of mind to prospective students that their chosen institution has the caliber of teaching, the level of student support, and the professional affiliations they need to succeed in their educational goals.

Saint James School of Medicine is accredited by various bodies and listed in several key international directories of medical institutions.

For more information on Bonaire's accreditations [CLICK HERE](#) and Anguilla's accreditations [CLICK HERE](#)

Congratulations to all the students who made it to the Dean' list in the Fall 2010 semester. Keep up the good work!

MD4: 1. Samir Shahren, 2. Denny Goss, 3. Eric Lessard

MD3: 1. Chandima Siyambalapatiyage Dona, 2. Najmus Kazmi

MD2: 1. Ryan Monti, 2. William Yonga

MD1: 1. David Jaeger, 2. Joseph Sipos, 3. Danita Pirtle

PM4: 1. Parth Patel, 2. Dane Paterson

PM1: 1. Angelica Fernandes

CASE OF THE MONTH

A 67 year old woman arrives at the emergency room with pain in her left shoulder that radiates to the breastbone. The pain also travels to the pit of her stomach. The medical student takes a very thorough history.

The facts of the case are: The woman has had many attacks of pain for over ten years, with lengthy intervals between them. During the past two weeks, the attacks have occurred everyday. She has not been able to work. She gets the pain after engaging in gardening or similar exercise. The pain is not that bad, and she is able to recover after resting. Examination shows a shoulder joint within normal limits, range of motion is free. The heart is slightly enlarged, but within normal limits. There is no elevation of cardiac enzymes.

What is the diagnosis and treatment?

ANGUILLA RECEIVES IMED LISTING!

The joy was felt from the floor in the Chicago office to the walls in the Anguilla campus as cheers echoed. Congratulations!

FACEBOOK

We've got a new Facebook Fan page, with regular competitions and great prizes like iPads, restaurant vouchers, iTunes vouchers and anything else we can think of to say thanks to you guys for being so great. Become a fan on our new page and get to know us better, find out what it's really like to study medicine in the Caribbean, talk with other students, ask questions on our discussion board, see photos of the School campuses and enter competitions.

Check us out on Facebook.
