

PARTNERSHIP WITH AMERICARE TECHNICAL SCHOOL

Americare Technical School thrives in bringing together students of many types of cultural backgrounds to study the field of nursing.

Our program prepares students in all areas of general education courses to multiple types of nursing practices. We welcome students as young as high school graduates to join the nursing field. Our goal is to bring in students of all ages who are passionate in helping people and improving the world of Healthcare.

When entering the program a student will complete prerequisite courses before beginning nursing courses. The prerequisite courses will prepare the students for the work load in the Practical Nursing program. Those courses include; Medical Terminology, Nutrition for Nursing Math for Healthcare Professionals, Anatomy and Physiology I, Anatomy and Physiology II, Introduction to Psychology, Introduction to Computers, and Introduction to Health Science. Our program is accelerated which means a student will complete the whole program within 21 months.

Our Career Path

Child Nursing

Career after completion of our Program

Our program is 107 credit hours. Once a student completes 107 credits they will have obtained a Licensed Practical Nursing Certificate. From there on the student can bridge into Saint James School of Medicine to become a Physician. By completing our program first this guarantees a student acceptance into St. James School of Medicine. By having this bridge program it motivates students to realize the possibilities are endless. They will no longer have to compete with millions of students across the country to get into medical school. By attending Americare Technical school a student is one step closer to working in the field of medicine.
